Beyond the design, the value and the quality  
of the final product is based above all on the expertise of the  
craftsmen who realize it.

## Our mission

Our mission since 1988 has been to promote local design.

As a producer, we develop our own products line showcasing various talented Montreal's designers. From the design, to manufacturing in our local workshop, to marketing the final product.

The furniture we produce are characterized by exemplary mastery of traditional and contemporary woodworking techniques. We are committed to the manufacture of quality, authentic, original and durable through the application of our extended expertise and responsible manufacturing methods.

## Custom made

Interversion has an in-house team of designers and craftsmen who will assist you throughout the creation and manufacturing process according to your needs and budget. By leveraging our expertise, we offer several options and opportunities to satisfy the increasing demands of our customers, whether you are a company, designer, decorator, architect, or just a passionate customer.

Whether you need a durable custom-made piece for your home or office, Interversion can help you turn it into reality by introducing you to local craftsmen. After the initial needs and budget analysis, our team will provide you with a host of personalized solutions. We'll assist you in many ways including taking the measurements, drafting preliminary plans, sketching 3D drawings, and material selection. You can even bring your own designers or resources and we'll gladly collaborate with them to make your project a success.

## Our solid wood

As quality and durability are our main focus, we take necessary precautions to prevent our solid wood furniture from bending or cracking throughout time.

The use of North American hard wood, the computer-controlled Kiln drying and the storage of our wood in a humidity-controlled warehouse are part of the precautions we consider necessary to fulfill our commitment and dedication to our clients.

We are proud to say that we purchase our wood only from "certified by the forest Steward-ship" (FSC) supplier.

## Our processed wood

High-quality furniture in veneered wood is possible. It's the quality and the origin of the transformed materials that are used that makes the difference.

That is why, when we assemble from chipboard veneer, we use transformed local products processed by the local industry.

We also personally choose, one by one, the veneer at our local supplier, favoring those that respond to our criteria of a perfect wood grain. The experience taught us that this approach was the best one.

We believe in the expertise of our local suppliers and in their high-quality control.

## Our hardware

We only use European hardware, since we believe that copies don't equal in quality and durability the original pieces that you might encounter on our furniture.

The hardware options can be customized, just like the design of our furniture. Whether for a handle or a hinge we will accompany you for the best personalization of your order.

These pieces, are made to last throughout ages.

## Our finishes

The natural hard oil that we use to finish our furniture is ecological and at the same time resistant. Its composition made of wax and oil protects and hydrates the wood, while sublimating its natural grain. The oil isn't only characterized by its natural state, meaning being biodegradable and environmental friendly, it is also defined by being resistant to scratches and stains.

A regular maintenance for the furniture, followed by the proper instructions, will restore its natural new look.

Our ultra mat catalysts lacquer offer the best protection against UV and the finest resistant features upon possible wear. This would be the ideal option for customers who do not wish to constantly have to maintain their furniture.

## Upholstery

Our upholsters hold the ability to conceive armchairs and sofas in accordance to the rules of art.

The solid wood structures screwed and glued, the spring suspensions or top-quality webbing and our feathers and locally sources foam are liable and sustainable options.

Finally, the seams neatly executed on our fabrics and leather imported from Europe, demonstrate the great talent of our artisans.
